DENVER INTERNATIONAL

Denver International Airport (DEN) is a commercial service airport located 16 miles northeast of downtown Denver. The airport is owned and operated by the City of Denver and was opened as a new airport in February 1995. DEN is the primary commercial service airport for the Denver metropolitan area and acts as an international hub for Colorado and the surrounding states. DEN is served by more than 20 airlines that offer nonstop flights to over 170 destinations across four continents. The airport has six runways including runway 16R/34L, which, at 16,000 feet long, is the longest commercial service runway in North America. In addition to air carrier passenger operations at DEN, the airport supports large scale air cargo and charter activities.

Airport Classification

The 2020 Colorado Aviation System Plan (CASP) has identified six functional classifications for Colorado's 65 publicly-owned, public-use airports and one privately-owned, public-use airport. The six classifications were newly developed for the 2020 CASP and replace the roles previously developed in the 2011 study. These classifications follow the Federal Aviation Administration's (FAA) role categories as defined by the National Plan of Integrated Airport Systems (NPIAS) and the ASSET study. However, the CASP expands upon these roles to create more specific classifications for airports that are not included in the NPIAS. Airports that are included in the NPIAS are eligible for federal funding. As of the 2019 NPIAS publication, 48 publicly-owned airports and one privately-owned airport in the Colorado airport system are included in the NPIAS, while 17 publicly-owned airports are not.

Denver International Airport is one of 14 airports in Colorado classified as a Commercial Service airport. The airport has scheduled commercial air carrier service and provides access to large metropolitan areas around the country. These airports receive higher levels of activity from a wide variety of aircraft and airport users. Commercial Service airports often serve as gateways for interstate and international travelers and host many aviation- and non-aviation-related businesses that support the local community.

Denver International Features

睭	Associated City/County	Denver/Denver	
	Associated OEDIT Region	3 - Denver Region	
Ŷ	Annual Enplanements (2018)	31,363,570	
**	Annual Operations (2018)	594,522	
×	Number of Based Aircraft (2018)	2	
	Runway(s)	6	
1	Air Traffic Control Tower	Yes	

Economic Impacts of DEN

The 2020 Colorado Aviation Economic Impact Study (CEIS) measured the economic impacts of all airports in the state. Denver International is one of 14 commercial service airports contributing to the state's aviation economic impacts. The components that comprise the total economic impacts for DEN are summarized below. Visit the project website to learn more about the methodology used to determine the economic impacts of DEN and all other Colorado airports.

Airport Needs and Recommendations

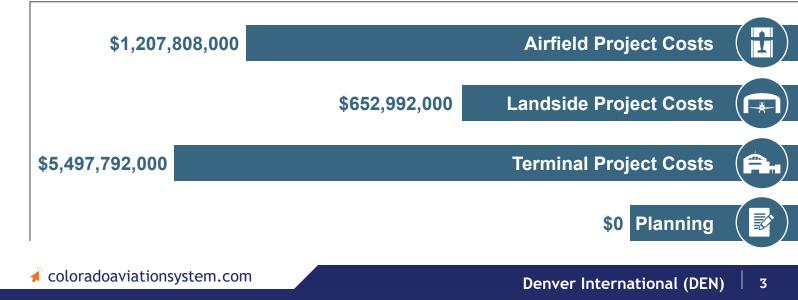

The 2020 CASP identified several performance measures (PMs) and facility and service objectives (FSOs) to provide a baseline for the infrastructure, facilities, and service capabilities required to best support the type and volume of aviation activity typified by each classification. The CASP identified gaps between the airport's existing condition and the needs to satisfy PMs, FSOs, and/or future facility needs driven by aviation demand forecasts. It is important to note that the PMs and FSOs are not requirements or mandates for airports to meet, rather, they serve as guidelines for airports and CDOT Division of Aeronautics to use during the airport planning process. Airports considered to be deficient in meeting the PMs and/or FSOs were reviewed to determine the recommended projects needed to satisfy those components.

Planning level costs were developed for recommended projects and were associated with the appropriate goal category, PM, or FSO. These costs were developed based on 2019 Colorado material costs and industry knowledge and were adjusted to reflect cost differentials between types, sizes, and locations of airports. Projects and associated costs from available airport master plans and the CDOT 20-year Capital Improvement Program (CIP) were also incorporated into the CASP to provide an estimate of the airport's needs based on meeting PMs and FSOs as well as forecasted future demand. The project cost estimates for Denver International to meet appropriate goals, PMs, and FSOs, and projects identified by the airport from other planning efforts, are categorized by project type in the following chart.

Did You Know?

DEN is the fifth busiest airport in the U.S. in terms of passenger enplanements with more than 31 million passengers carried in 2018. DEN created and participates in several community outreach programs that provide unique services and amenities for passengers traveling through the airport. DEN offers a variety of local and healthy dining options, quiet places for religious worship, and an open-air plaza available for community concerts, beer festivals, and seasonal ice skating.

Airport Project Costs by Type

Airport Report Card

Facility and service objectives (FSOs) were developed for each of the six airport classifications in the 2020 CASP. The following table details the FSOs and corresponding performance of Denver International. These objectives were analyzed in conjunction with the other performance measures (PMs) to determine the airport's project needs and associated costs.

Objective Category	Commercial Service Objective	Current Condition				Meets 2020 Objective?			
Airfield									
ARC	C-III/C-II		D-	·VI		Yes			
Runway Length	Align with Master Plan	12,000 feet (Unknown)			Yes				
Runway Width	150 feet/100 feet	150 feet			Yes				
Runway Strength	unway Strength 60,000 pounds 116,000 lbs SW; 240,000 lbs DW; 515,000 lbs 2D				lbs 2D;	Yes			
	1,085,000 lbs 2D2D				No.				
Taxiway Buoway Markings						Yes Yes			
Runway Markings Precision Precision Lighting/NAVAIDS									
Approach Precision Precision									
Visual Aids	ALS, rotating beacon, lighted wind cone, REILs, VGSIs	MALSR, rotating beacon, lighted wind cone, REILs, VGSIs			Yes Yes				
Runway Lighting	HIRL or MIRL	HIRL			Yes				
Weather Reporting	On-site ASOS or AWOS	ASOS				Yes			
		port Facilities							
Terminal (CS and/or GA)	Acceptable ratio of terminal square footage and commercial apron for passenger enplanements and commercial operations	Minimum required terminal square footage:	3,136,000 sq ft	Terminal building square footage:	7,496,972 sq ft	Yes			
Apron Tie-Downs	Tie-downs for 20% of based aircraft fleet plus 50% of weekly average overnight transient storage during peak season	20% of based aircraft fleet plus 50% transient aircraft fleet:	29	Total tie-down spaces:	12	Νο			
	Hangars for 80% of based aircraft fleet and 50% of weekly average overnight transient storage	80% of based aircraft fleet:	2	Number of based aircraft hangar spaces:	3	Νο			
Hangars		50% of transient aircraft fleet:	28	Number of transient aircraft hangar spaces:	3				
Dedicated Maintenance/SRE Storage Building	Yes	Yes			Yes				
Electric Vehicle Charging Stations	Yes	Yes				Yes			
Perimeter Security	Full perimeter fencing with security gates and appropriate signage	Full perime	Yes						
	Se	rvices/Other
