

# FORT MORGAN MUNICIPAL

Fort Morgan Municipal Airport (FMM) is a publicly-owned general aviation airport in northeastern Colorado, located approximately five miles north of Fort Morgan. The airport is owned and operated by the City of Fort Morgan. FMM has one asphalt runway (14/32) and two turf runways. Runway 14/32 is 5,731 feet long by 75 feet wide and is equipped with a non-precision instrument approach. The airport is primarily used for recreational flying, aerial crop application, and aerial inspections. Additionally, FMM is home to a fixed-base operator (FBO), a skydiving operation, and CO Fire Aviation, which maintains a fleet of single engine air tanker (SEAT) aircraft that conduct aerial/wildland firefighting operations around the state.

## Airport Classification

The 2020 Colorado Aviation System Plan (CASP) has identified six functional classifications for Colorado's 65 publicly-owned, public-use airports and one privately-owned, public-use airport. The six classifications were newly developed for the 2020 CASP and replace the roles previously developed in the 2011 study. These classifications follow the Federal Aviation Administration's (FAA) role categories as defined by the National Plan of Integrated Airport Systems (NPIAS) and the ASSET study. However, the CASP expands upon these roles to create more specific classifications for airports that are not included in the NPIAS. Airports that are included in the NPIAS are eligible for federal funding. As of the 2019 NPIAS publication, 48 publicly-owned airports and one privately-owned airport in the Colorado airport system are included in the NPIAS, while 17 publicly-owned airports are not.

Fort Morgan Municipal Airport is one of 19 airports in Colorado classified as a GA-Local airport. GA-Local airports are classified as having on-site weather reporting and occasionally supporting IFR flight operations. GA-Local airports are the most common classification of airport and link smaller population centers to the national airport system. Airports in this role are primarily used by piston aircraft for personal and business purposes and frequently accommodate flight training, emergency medical services, and/or charter passenger services.

|    | Associated OEDIT Region         | 1 - Golden Plains Region |
|    | FAA GA ASSET Classification     | Local                    |
|    | Annual Operations (2018)        | 10,000                   |
|   | Number of Based Aircraft (2018) | 31                       |
|  | Runway(s)                       | 3                        |
|  | Air Traffic Control Tower       | No                       |

## Economic Impacts of FMM

The 2020 Colorado Aviation Economic Impact Study (CEIS) measured the economic impacts of all airports in the state. Fort Morgan Municipal is one of 56 general aviation airports contributing to the state’s aviation economic impacts. The components that comprise the total economic impacts for FMM are summarized below. Visit the project website to learn more about the methodology used to determine the economic impacts of FMM and all other Colorado airports.

# Airport Needs and Recommendations

The 2020 CASP identified several performance measures (PMs) and facility and service objectives (FSOs) to provide a baseline for the infrastructure, facilities, and service capabilities required to best support the type and volume of aviation activity typified by each classification. The CASP identified gaps between the airport’s existing condition and the needs to satisfy PMs, FSOs, and/or future facility needs driven by aviation demand forecasts. It is important to note that the PMs and FSOs are not requirements or mandates for airports to meet, rather, they serve as guidelines for airports and CDOT Division of Aeronautics to use during the airport planning process. Airports considered to be deficient in meeting the PMs and/or FSOs were reviewed to determine the recommended projects needed to satisfy those components.

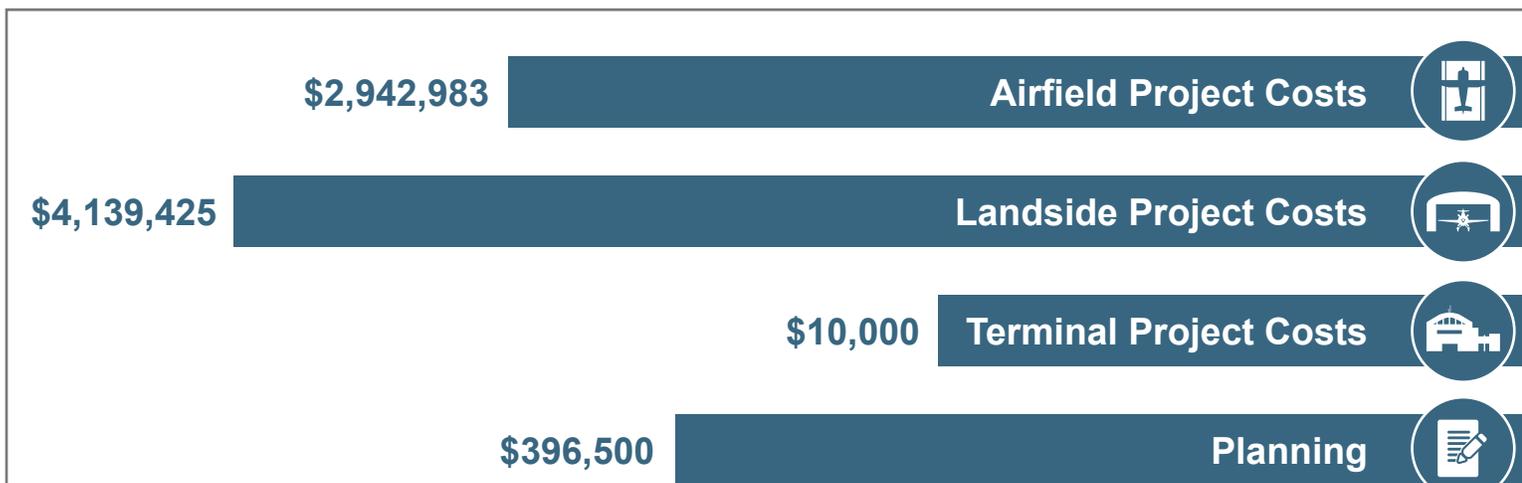

Planning level costs were developed for recommended projects and were associated with the appropriate goal category, PM, or FSO. These costs were developed based on 2019 Colorado material costs and industry knowledge and were adjusted to reflect cost differentials between types, sizes, and locations of airports. Projects and associated costs from available airport master plans and the CDOT 20-year Capital Improvement Program (CIP) were also incorporated into the CASP to provide an estimate of the airport’s needs based on meeting PMs and FSOs as well as forecasted future demand. The project cost estimates for Fort Morgan Municipal to meet appropriate goals, PMs, and FSOs, and projects identified by the airport from other planning efforts, are categorized by project type in the following chart.

## Did You Know?

FMM has hosted multiple International Aerobatics Club (IAC) sanctioned collegiate competitions with participants traveling from around the country. Students from four schools, including Metropolitan State University of Denver (MSU) participated in a series of events that test each pilot’s ability to perform a series of pre-determined maneuvers. Qualifiers from each program then traveled to the national competition in Oshkosh, Wisconsin.

## Airport Project Costs by Type

# Airport Report Card

Facility and service objectives (FSOs) were developed for each of the six airport classifications in the 2020 CASP. The following table details the FSOs and corresponding performance of Fort Morgan Municipal. These objectives were analyzed in conjunction with the other performance measures (PMs) to determine the airport’s project needs and associated costs.

| Objective Category                         | GA-Local Objective  | Current Condition  |    |   |    | Meets 2020 Objective?   |
|--|---|--|----|---|----|-------------------------|
| <b>Airfield</b>                            |   |  |    |   |    |                         |
| ARC  | B-II  | B-II   |    |   |    | Yes                     |
| Runway Length                              | Accommodate 100% of small aircraft adjusted for elevation and mean maximum daily temp during hottest month          | 5,731 feet (5,900 feet)  |    |   |    | No                      |
