

2025 Colorado Aviation ECONOMIC IMPACT STUDY

Individual Airport Economic Impact Report

Eads Municipal (9V7)

Eads Municipal Airport (9V7) is a general aviation airport located in Kiowa County in southeast Colorado. 9V7 has a single asphalt runway (17/35) with a length of 3,860 feet and width of 60 feet. The airport is owned and operated by the Town of Eads and supports many types of aeronautical activities in the region including general aviation services, emergency medical evacuations, aerial agricultural application, and military activities. 9V7 is used to transport doctors to Eads from other areas of the state to provide essential medical services that would otherwise be unavailable in the community. Additionally, the airport serves as a local base for seasonal aerial agricultural application activities and wildlife patrols. Beyond the general aviation users, 9V7 is also used by various types of military training including fixed-wing aircraft and helicopters.

Economic Impacts of

Eads Municipal (9V7)

Eads Municipal is one of 66 public use airports that contribute to the State's aviation economic impact. To understand how 9V7 and other airports support economic activity, the Colorado Department of Transportation (CDOT) Division of Aeronautics undertook the 2025 Colorado Aviation Economic Impact Study (CEIS). The study determined that 9V7 generated the below total economic activity in 2023. Of the \$503 thousand of total business revenues generated by 9V7, \$467 thousand were generated by on-airport activities and \$36 thousand generated by visitor spending.¹

2025 Colorado Aviation **ECONOMIC IMPACT STUDY**

What is Economic

Two types of economic impacts are generated as a result of airport

activity: Direct Impacts and Multiplier

Effects (supplier sales and income re-spending). Direct impacts come from the activities of the airport

administration, on-airport tenants,

capital improvement spending, and spending by visitors arriving on

commercial and general aviation aircraft. Multiplier effects are generated when portions of direct revenues are used to purchase goods and services from Colorado businesses

(supplier sales), and when income

spending effects for the state.

earned by workers in airport-supported jobs is spent at Colorado businesses (income re-spending). Total Impacts

represent the summation of the direct impacts, supplier sales, and income re-

Impact?

Economic Impact Measures

Economic Impacts are communicated by the total jobs, payroll, value added, and business revenues generated by each airport. These are defined as:

Total number of people employed, both full-time and part-time.

Payroll

Total employment compensation, including wages, benefits, and taxes paid on behalf of employees.

Value Added

Total contribution to the Gross State Product. It includes all payroll, profits, and business taxes paid.

Business Revenues

Total expenditures for airport administration, capital projects and tenant sales of goods and services, as well as visitor spending in Colorado's hospitality-related sectors. Also referred to as "output," "sales," or "economic activity/impact."

Statewide Aviation **Economic Impacts**

Colorado's 66 public use airports range from small GA airports to a major international airline hub, all of which contribute to the state's economy. The impacts of on-airport activities and visitor spending associated with each airport, combined with the statewide impacts of off-airport air cargo operations, helped Colorado's aviation system generate \$68.9 billion in total economic activity (business revenues) in 2023.
