2025 Colorado Aviation ECONOMIC IMPACT STUDY

Individual Airport Economic Impact Report

Blanca (05V)

Blanca Airport (05V) is a general aviation airport located three miles southwest of the Town of Blanca in the San Luis Valley. The airport is owned and operated by the Town of Blanca. The airport has a single dirt runway (03/21) that is 6,160 feet long by 52 feet wide.Due to its location in the fertile San Luis Valley, the airport is most commonly used by aerial agriculutral applicators to treat nearby farmland. 05V also provides emergency access for the town and offers an emergency landing site for aircraft flying near the Sangre De Cristo mountains.

- Emergency Access

Economic Impacts of

Blanca (05V)

Blanca is one of 66 public use airports that contribute to the State's aviation economic impact. To understand how 05V and other airports support economic activity, the Colorado Department of Transportation (CDOT) Division of Aeronautics undertook the 2025 Colorado Aviation Economic Impact Study (CEIS). The study determined that 05V generated the below total economic activity in 2023. Of the $20 thousand of total business revenues generated by 05V, were generated by on-airport activities and $21 thousand generated by visitor spending.[1]

1 total jobs

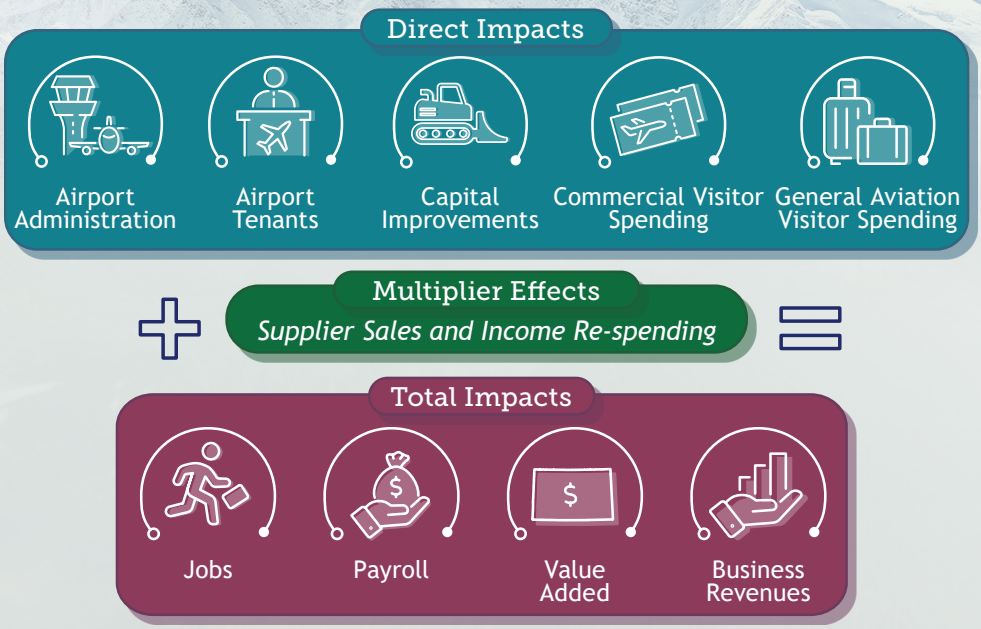

$6K total payroll

$12K total value added

$20K total business revenues

2025 Colorado Aviation ECONOMIC IMPACT STUDY

What is Economic Impact?

Two types of economic impacts are generated as a result of airport activity: Direct Impacts and Multiplier Effects (supplier sales and income re-spending). Direct impacts come from the activities of the airport administration, on-airport tenants, capital improvement spending, and spending by visitors arriving on commercial and general aviation aircraft. Multiplier effects are generated when portions of direct revenues are used to purchase goods and services from Colorado businesses (supplier sales), and when income earned by workers in airport-supported jobs is spent at Colorado businesses (income re-spending). Total Impacts represent the summation of the direct impacts, supplier sales, and income re-spending effects for the state.

Economic Impact Measures

Economic Impacts are communicated by the total jobs, payroll, value added, and business revenues generated by each airport. These are defined as:

Jobs
Total number of people employed, both full-time and part-time.

Payroll
Total employment compensation, including wages, benefits, and taxes paid on behalf of employees.

Value Added
Total contribution to the Gross State Product. It includes all payroll, profits, and business taxes paid.

Business Revenues
Total expenditures for airport administration, capital projects and tenant sales of goods and services, as well as visitor spending in Colorado's hospitality-related sectors. Also referred to as "output," "sales," or "economic activity/impact."

Statewide Aviation Economic Impacts

Colorado's 66 public use airports range from small GA airports to a major international airline hub, all of which contribute to the state's economy. The impacts of on-airport activities and visitor spending associated with each airport, combined with the statewide impacts of off-airport air cargo operations, helped Colorado's aviation system generate $68.9 billion in total economic activity (business revenues) in 2023.

348,466 total jobs

$23.5B total payroll

$40.3B total value added

$68.9B total business revenues
